Purpose:

This software provides the graphical user interface (GUI) for the Eclipse/T1/SET10/Kettle models machines. It serves as a demo application where recipe cooking steps are simulated.

The software will not support error handling, and it works with or without an IO board.

The main goal of this version to simulate the temperature when the recipe started without any reading from outside world

Intended Use:

Test software. As deemed by Cleveland Range.

Changes:

- Use Jacket Temperature on header text on recipe run view in any mode.
